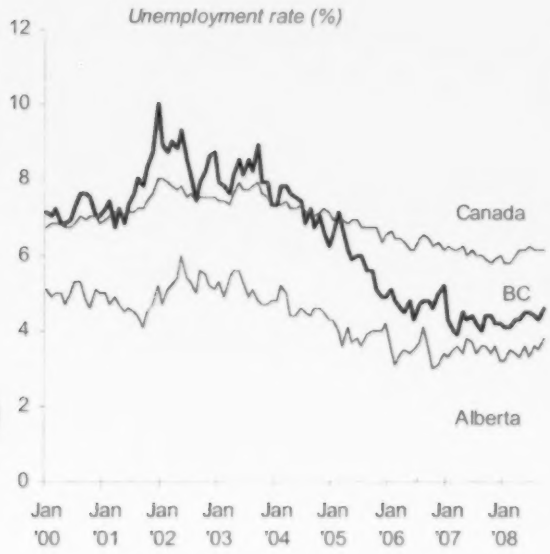
Labour Force Statistics ◆ September 2008

(All labour force statistics are seasonally adjusted, unless otherwise indicated)

Unemployment rate rises to 4.6% in September



Data Source: Statistics Canada

British Columbia's unemployment rate increased 0.3 percentage points in September, rising to 4.6%. The uptick in the jobless rate occurred as the number of people with jobs fell slightly (-0.2%), while the labour force grew 0.1%.

The Canadian rate was unchanged in September, marking the third straight month in which it has remained at 6.1%. Nationally, the labour force and employment grew in tandem, rising 0.6% during September. This was the strongest job growth in more than two years. However, the increase was concentrated in part-time employment–the number of part-time jobs was up 3.1%, while full-time employment rose 0.1%.

BC's unemployment rate remains among the lowest in the country, with only Alberta (3.8%) and Saskatchewan (4.1%) recording a lower incidence of unemployment. Manitoba's rate was the same as BC's. In the rest of the country, rates ranged from 6.4% in Ontario to 13.3% in Newfoundland & Labrador.

Goods producing industries take on more workers; service sector cuts back

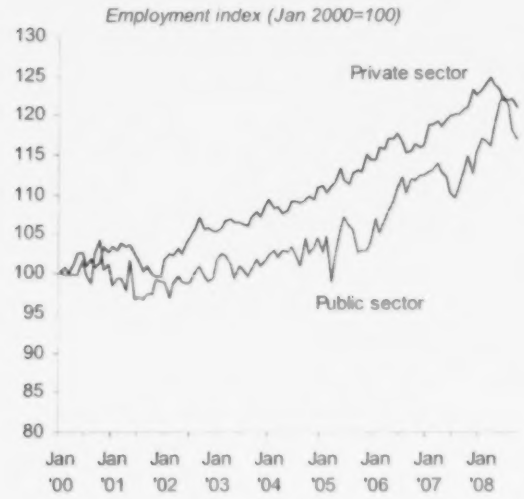
Employment in the province's goods producing industries rose 1.4% in September, boosted by big gains in construction (+3.6%) and forestry, fishing & mining (+6.0%), where employment bounced back after slipping in August. The number of manufacturing jobs fell (-0.4%) for a second straight month, and other goods industries also reduced the size of their workforce.

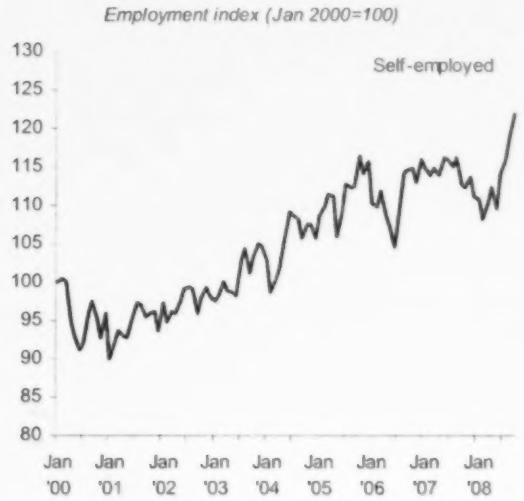
In the service sector, which employs eight out of every ten BC workers, the situation was also somewhat tenuous. The number of service sector jobs was down (-0.7%) for the fourth time in five months, as most of the major industries in the sector cut back on employment. Wholesale & retail trade (-3.9%) and transportation & warehousing (-2.3%) posted substantial declines, as did several other industries. Finance, insurance & real estate (+4.9%), health care & social assistance (+4.0%) and information, culture & recreation services (+2.6%) were the only service industries where employment increased during September.

Self-employment rising

Both the private (-0.9%) and public (-1.0%) sectors shed jobs in September. However, this was offset by a big increase (+2.7%) in the number of self-employed British Columbians. Self-employment has picked up speed in recent months as job growth in the private and public sectors has slowed.

Self-employment in the province has been increasing as job growth in the private and public sectors has slowed





Data Source: Statistics Canada

Full-time employment fell (-0.4%) for a second straight month, but the number of people with part-time jobs was up 0.6%.

The unemployment rate for young people (aged 15 to 24) inched down to 8.1%, while those who were 25 and over saw a 0.4 percentage point increase in the jobless rate, which rose to 3.9%. Men aged 15 and over (4.3%) were less likely to be unemployed than were women (5.0%).

The Regions

Among the regions, Kootenay continued to see a decline in both the number of jobs and the size of its labour force, both of which fell more than eight percent (*3-month moving average*) during September. Employment was also down (-1.3%) in Cariboo, but other regions of the province fared better. Despite the declines, the jobless rate in all parts of the province remained low by historic standards, ranging from 4.1% in Vancouver Island/Coast to 6.8% in both Cariboo and North Coast/Nechako. Kootenay, where a long-run decline in the number of jobs has been offset by a similarly large drop in the size of the region's labour force, posted a 6.4% unemployment rate.

Among municipalities, residents of Kamloops (4.7%), Kelowna (5.1%) and Chilliwack (5.7%) continued to experience a relatively low incidence of joblessness, while those living in Nanaimo (7.4%) and Prince George (8.2%) were much more likely to be unemployed. Labour market conditions in Vancouver Island/Coast remain polarized, with residents of Victoria benefiting from a very low jobless rate (3.7%) while workers in other parts of the region have not fared as well.

NOTES: *1. Occupation specific Unemployment Rates include only those unemployed who worked in the past year. The "All Occupations" rate incorporates total unemployed persons which includes an "Occupation Unclassified" category.*

2. Due to the relatively small sample sizes from which disaggregated data are derived, caution should be used in the interpretation of month-to-month changes in the estimates.

Labour Force Statistics

This report is based on statistics from the Labour Force Survey produced monthly by Statistics Canada. Questions and comments should be directed to Data Services at (250)387-0327 or write to BC.Stats@gov.bc.ca

Definitions and Explanatory Notes

Reference Week

Monthly estimates of employment, unemployment, and persons not in the labour force refer to the specific week covered by the survey each month, normally the week containing the 15th day.

Labour Force

The labour force is composed of those members of the civilian non-institutional population 15 years of age and over who, during the reference week, were employed or unemployed.

Employed

Employed persons are those who, during the reference week, either: (a) did any work at all, or (b) had a job but were not at work due to own illness or disability, personal or family responsibilities, bad weather, labour dispute, vacation, or other reason not specified above (excluding persons whose job attachment was to a job to start at a definite date in the future).

Unemployment

Unemployed persons are those who, during the reference week, either: (a) were without work, had actively looked for work in the past four weeks (ending with the reference week), and were available for work; or (b) had not actively looked for work in the past four weeks but had been on layoff and were available for work; or (c) had not actively looked for work in the past four weeks but had a new job to start in four weeks or less from the reference week, and were available for work.

Unemployment Rate

The unemployment rate represents the number of unemployed persons expressed as a percentage of the labour force. The unemployment rate for a particular group (age, sex, marital status, etc.) is the number of unemployed in that group expressed as a percentage of the labour force for that group.

Participation Rate

The participation rate represents the labour force expressed as a percentage of the population 15 years of age and over. The participation rate for a particular group (age, sex, marital status, etc.) is the labour force for that group expressed as a percentage of the population for that group.

Employment Rate

The employment rate(employment/population ratio) is the number of employed persons expressed as a percentage of the population 15 years of age and over. The employment rate for a particular group (age, sex, marital status, etc.) is the employment for that group expressed as a percentage of the population for that group.

Rounding

Estimates published by the Labour Force Survey are rounded to the nearest thousand but all derived values (totals, averages, rates, ratios, percent changes etc.) are calculated from unrounded figures. Therefore, the sum of the individual rounded items may not equal the total. Unadjusted estimates rounded to hundreds are available from BC Stats on request.

Seasonal Adjustment

Fluctuations in economic time series are caused by seasonal, cyclical and irregular movements. A seasonally adjusted series is one from which seasonal movements have been eliminated. Seasonal movements are defined as those which are caused by regular annual events such as climate, holidays, vacation periods, and cycles related to crops, production and retail sales associated with Christmas and Easter. It should be noted that the seasonally adjusted series contain irregular as well as longer-term cyclical fluctuations.
